Head Injury – During School Hours

Any injury to the head can turn out to be serious. Please report all head bumps to the school nurse.

The School Nurse will contact the parent/guardian concerning any head bump. If medical attention beyond observation throughout the school day is indicated, then a Student Incident Report needs to be completed.

The School Nurse shall send home a “Head Injury Notification” with the child but ONLY after the School Nurse has contacted the parent/guardian concerning the child’s head bump. Any head bump can change over time and this notice contains helpful information. It is not a substitute to have talked with the parent/guardian concerning the head bump.

Traumatic Brain Injury is a much more serious concern and a brochure on the Blue Valley TBI Team is available in the Principal Packet.

Head Injury - After-School Activity

Any injury to the head can turn out to be serious. To avoid delay in parent/guardian notification, the coaching staff or sponsor must report all head injuries to a parent/guardian of the injured student during or immediately following the game or practice where the injury occurred. The coach or sponsor must also contact the school nurse prior to the next business day detailing the student name, time, place, description of event, and parent/guardian who was contacted.

The school nurse shall send home a “Head Injury Notification” to a parent/guardian but ONLY after the coach or sponsor has contacted the parent/guardian concerning the child’s head injury. Any head injury can change over time and this notice contains helpful information. The “Head Injury Notification” is not a substitute for talking with the parent/guardian concerning the head injury.

Traumatic Brain Injury is a much more serious concern and a brochure on the TBI Blue Valley Team is available in the Principal Packet.
